DecoBird® - knocks on your door!

New and larger hand-carved wooden garden birds. We are now expanding the series with five realistic birds!

DecoBird® is a series of 17 hand-carved wooden birds, exquisitely painted with environmentally friendly, water- and UV-resistant colours, and are therefore suitable for both indoor and outdoor use. The birds are life-size and modelled after common European birds.

The first collectors' series was introduced in the summer of 2007 the success they have achieved will be matched by the five new birds. Here you will find the great spotted woodpecker, the green woodpecker, the black woodpecker, the common kingfisher and the owl.

If you are curious and would like to learn more about garden birds, www.wildlifegarden.co.uk has a bird school where you can learn how to recognize 60 of the most common species of small birds and listen to their different calls. There is also extensive information about the company's complete range of products.
