January 2010

Charming doorstep

The most charming new product of the year is these hand carved and hand painted doorstops with forest animals from Wildlife Garden.

The doorstops are made from lime wood and brush painted with environmentally friendly, water based paint. The realistic forest animals are beautifully hand carved and are available in three different motifs: frog, mouse and snail.

The underside has a silicone coating that means that doorstep won't slip due to the pressure from the door. It stays still and keeps the door in place. Each doorstep comes individually packed in a gift box that is easy to promote and makes a wonderful gift.

A list of retailers is available at www.wildlifegarden.info; here you can also take a look at our other products for a living garden. While you are there, why not pay a visit to our "Bird school".
