Pictures & text available on the accompanying CD

October 2007

## Release DecoBird® - Garden Life into the familiar!

### DecoBird®, a series of hand carved wooden garden birds.

DecoBird is a series of hand carved wooden birds, exquisitely painted with non-toxic colours. The birds are life sized and modeled after common European garden birds. Each bird has an accompanying brochure, in which the species is described in an informative and pleasant way, as well as how it lives and what kind of habitat it prefers.

Wildlife Garden introduces the first series of DecoBird for collecting during the summer of 2007. It is comprised of twelve species; the great tit, the blue tit, the marsh tit, the bullfinch, the robin, the blackbird, the tree sparrow, the starling, the goldfinch, the white wagtail, the greenfinch and the nuthatch. The birds come individually packaged in a pretty gift box that is easy to display.

For those who are curious and want to learn more about the birds of our gardens, [www.wildlifegarden.co.uk](http://www.wildlifegarden.co.uk) has a "bird school" where they can learn to recognize 60 of the most common small birds and listen to their sounds and songs. The website also contains extensive information about the company's other products.

## Product information

<b>Appellation:</b>	DecoBird®
<b>Article number:</b>	WG401-WG412
<b>Quality:</b>	Hand carved in wood and paint brushed with non-toxic, water resistant and UV-proof colours.
